

Equipment and Technology Award Application

REQUIRED SECTIONS

Introduction and Description of Potential Equipment and/or Technology (*4 pages maximum*)

- Overview of the scientific field the equipment and technology will help serve.
- Description of how the requested resources will support/advance specific scientific fields, projects and/or HCC investigators.
- Description of the equipment and/or technology and comparison with similar available equipment/technology if applicable.
- Justification for the support of staff related to the equipment and/or technology development
- Management plan for equipment and/or technology deployment to the MUSC community.

Business Plan and Current Support

- Please include organization, finances and a plan for long term operation, cost recovery, cost effectiveness, cost sharing with other colleges, departments, schools, *etc.*
- Please include a list of all past and current internal and external funding that has supported the instrumentation/technology of the Shared Resource.
- Budget: Use [PHS 398 form page 4](#) followed by a written justification and a **quote of the instrumentation costs**.
- Cost analysis for similar equipment and/or technology (purchase price, service contract, reagents, etc.). Include direct costs only; there are no indirect costs associated with this grant. **No faculty salaries should be included. Any faculty effort related to this award must be listed and supported by the respective department as cost share.**
- Letter of support from the Department, College or Office of Research as applicable. By signing the cover page, departmental/college office of research business managers verify and approve this cost share. Include justification for all budget requests. The HCC reserves the right to reduce award amounts.
